

Perfect! Let's begin with the **first presentation speaker and topic**.

Speaker 1: Sujoy

Topic: Introduction – What is MessFinder & Why this project?

Script (Presentation Story)

Good morning respected teachers, evaluators, and fellow students.

We are the final year students from the Department of Computer Science, Bankura Sammilani College, and today, we are proud to present our group project – **MessFinder**.

Let me first give you an overview of what this project is all about.

MessFinder is a web-based platform designed to help students and working professionals **find and list PGs and rental rooms easily**. In India, especially in small towns and growing cities, finding a room or PG is still a major challenge – people rely on **Facebook posts, random posters, or word of mouth**, which are **unverified and often misleading**.

We identified this gap from our own experience and decided to build a system that brings everything to one place – verified rooms, direct communication between seeker and owner, with proper images and details.

This application is built not just for tech-savvy users but also for **first-time movers like students or job seekers**, and **small PG owners who don't have the tools to promote their rentals online**.

MessFinder offers an organized and simple solution for both groups – a **clean interface to search for accommodation**, and **a secure portal for owners to list and manage their rooms**.

By the end of this presentation, you will get a complete view of the problem we solved, how we built it, the technologies we used, and the impact it can create.

With that, I would now like to invite Priti to explain the **problem statement** that led us to this solution.

Tips for Sujoy:

- Speak calmly and with clarity, especially in the first 30 seconds
- Don't use technical terms yet – keep it simple and relatable
- Look around the room while speaking to engage audience

- Make slight hand gestures to point or emphasize
 - End confidently and pass to the next speaker
-

Likely Viva/Panel Questions for Sujoy:

Q: Why the name “MessFinder”?

A: Because in many Indian towns, shared rental places are called “Mess” or PGs. We wanted a name that sounds relevant, clear, and easy to remember.

Q: What motivated this project personally?

A: We’ve all faced difficulty when moving to a new area for study or training – relying on unverified sources or local help. We wanted to fix this experience.

Q: Is this idea inspired from OLX or 99acres?

A: Our idea is similar in utility, but OLX is broad and unverified. We focus specifically on PGs and verified interactions, with a student-friendly UI.
