

Great! Here's the next presentation script:

Speaker 4: Souvik

Topic: Social Impact – How MessFinder helps society

Script (Presentation Story)

Thank you, Reshmi.

Now I'll explain the **social impact** of MessFinder – that is, how this project is not just a technical system, but something that creates value for real people and communities.

Let's begin with the **most direct benefit**:

It benefits students and job seekers

When a student moves to a new place for college, or when someone gets a job in a different city, they often don't know where to live. MessFinder helps them find PGs or rooms quickly, with images, rent details, and contact options – **without being scammed or wasting time**.

It helps reduce anxiety during relocation and gives them access to **safe and verified options**.

It supports local PG owners and small landlords

Many PG owners, especially in small towns, don't have the knowledge or tools to promote their rooms online. MessFinder gives them a simple way to list rooms, upload images, and reach the right people – without depending on brokers or middlemen.

This helps **boost local micro-businesses** and **encourages digital participation**.

It promotes digital inclusion and trust

MessFinder is accessible on any mobile browser, even on low-end phones. It brings a **professional experience** to the local rental market. We're encouraging more people – both seekers and owners – to **adopt digital tools in a safe and secure way**.

This kind of inclusion is especially valuable in Tier 2 and Tier 3 cities.

So, to summarize:

- We make relocation easier for students
- We support local businesses
- And we reduce digital inequality

That's the broader social vision of MessFinder.

Now I'd like to invite **Moumita** to walk you through the **main features** of our application.

Tips for Souvik:

- Speak like you're describing a mission – not just a project
 - Emphasize human value: students, safety, empowerment
 - Nod slightly when listing people: “students and job seekers...”
 - Smile when speaking of “digital inclusion” – it's a strong point
-

Likely Viva/Panel Questions for Souvik:

Q: Do you think PG owners will really use this?

A: Yes, especially those who want more visibility without paying brokers. If we guide them once, it becomes easy.

Q: How do you ensure safety for seekers?

A: We avoid unverified posts. Listings are only created by logged-in owners, and rooms include photos and direct contact details.

Q: What's meant by digital inclusion?

A: Giving access to digital tools and platforms even to those who are not tech experts – like small PG owners or new renters.
